

Kannan M

Java Full Stack Developer | Spring Boot | React.js | REST APIs | MySQL

Tirunelveli, TN, India | +91 6383101198 | knkannan70@gmail.com | linkedin.com/in/kannan-m-0771562b2/ | github.com/knkannan70

PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer skilled in Spring Boot, React.js, MySQL, REST APIs, JPA/Hibernate, and JWT Authentication. Hands-on experience building a real-time AI application (**99.27% accuracy**) and a multi-user task platform with **10+ REST** endpoints and role-based access control. Seeking an entry-level Java Full Stack Developer role to deliver scalable, secure software solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python

Backend: Spring Boot, REST APIs, MVC, Hibernate, JPA, Maven, Gradle

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)

Database: MySQL - Joins, CRUD, Schema Design

Concepts: Object Oriented Programming, Data Structures & Algorithms, API Integration, JWT, RBAC, SDLC

AI/ML: TensorFlow Lite, CNN, LSTM, MobileNetV2

Tools: Git, GitHub, Postman, IntelliJ IDEA, MySQL Workbench

KEY PROJECTS

AI-Based Real-Time Violence Detection System [Academic Project]

Jan 2026 – Apr 2026

Tech: Java, Python, TensorFlow Lite, CNN, LSTM, MobileNetV2 | github.com/knkannan70/violence_detector

- Engineered a real-time Android app with on-device AI to detect and block violent content, ensuring full offline functionality and user privacy.
- Built a dual-model deep learning pipeline (MobileNetV2 + CNN-LSTM) achieving **99.27%** image accuracy and **92.33%** video accuracy, optimized for low-latency mobile inference.
- Deployed TensorFlow Lite models with background service architecture for continuous, non-intrusive content monitoring across Android OS versions.

Task Management System [Personal Project]

Sep 2025 – Nov 2025

Tech: Java, Spring Boot, React.js, MySQL, REST API, JWT | github.com/knkannan70/task-management-system

- Built a secure multi-user platform with **10+ RESTful** API endpoints, JWT-based authentication, and role-based access control (RBAC) for granular user authorization.
- Architected backend with Spring Boot + JPA/Hibernate ORM; optimized MySQL queries for improved data retrieval performance.
- Developed a fully responsive React.js frontend with real-time task tracking, dynamic state management, and intuitive UX following MVC design pattern.

Tourist Management System [Academic Project]

Jan 2024 – Apr 2024

Tech: HTML, CSS, JavaScript, PHP, MySQL | github.com/knkannan70/tourism

- Developed a travel booking platform with dynamic database integration supporting reservations and multi-step booking workflows with secure form validation.
- Designed a normalised MySQL relational schema with optimised indexing, reducing query redundancy and improving booking data retrieval performance.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Manonmaniam Sundaranar University, Tirunelveli, Tamil Nadu | **CGPA: 7.9**

Bachelor of Computer Applications (BCA)

2021 – 2024

Sri Parama Kalyani College, Tenkasi, Tamil Nadu | **CGPA: 7.4**

ACHIEVEMENTS

- Led a workshop on Web Development fundamentals for **60+ students** and received positive feedback.
- Conducted workshops on Artificial Intelligence and Java Full Stack Development for **100+ peers and junior students**, strengthening their understanding of modern software development practices.

CERTIFICATIONS

Java Programming - Infosys (2026), **ReactJS** - Infosys (2026), **Data Structures & Algorithms** - ScholarHat (2026)
